ABOUT ME

*Aspiring Full Stack Developer
currently enrolled in the
University of Washington
Coding Boot Camp with a
passion for making responsive,
user-friendly websites.*

I am well-organized and collaborative with a strong work ethic, and a passion for continuous learning. Upon completion of the boot camp I'm looking forward to the opportunity to apply my new skills in the non-profit field.

SKILLS

Git

Bootstrap

EDUCATION

Certificate, Full Stack Web Development
University of Washington Coding Boot Camp
2019 – 2020

BA, Business Administration
& minor Entrepreneurship & Innovation
Seattle University
2012

PROJECTS

Adopt-A-Pet

<https://rachelrohrbach.github.io/pet-adoption/>

This project is a pet adoption search and resources mapping website that:

- Utilizes user input to search RescueGroups.org API for cats and dogs available for adoption
- Retrieves the data in a JSON format and dynamically updates the HTML & CSS via JavaScript and jQuery to display search results
- Uses the Google Maps JavaScript API to offer users pet resources based on location

Code Quiz

<https://rachelrohrbach.github.io/code-quiz/>

This project is a timed quiz that tests the user's code-based knowledge

- It calculates the user's score by the time remaining. Answering quickly and correctly results in a higher score. Answering incorrectly results in a time penalty.
- When the timer runs out and/or all questions are answered, the user inputs their initials to save the score locally on a high score list with up to 10 of the highest scores.
